

DIGITAL LABORATORY PLATFORMS

CAPA, Deviation & Change Management

Principal: LabWare

Structured handling of deviations, investigations, corrective actions and change control.

DESCRIPTION

Routes deviations, investigations, corrective and preventive actions and change controls through defined workflows with named owners and due dates. Because it is all in one system, the question of whether an action was effective can be answered from the record instead of reconstructed for the auditor.

APPLICATIONS

Deviation and out-of-specification handling, root cause investigation, change control, effectiveness checks, trending for management review.

METHOD & COMPLIANCE REFERENCE

Supports the quality system expectations of EU GMP Chapter 1 and ICH Q10.

SUPPLIED AND SUPPORTED IN BANGLADESH

- Import, customs, delivery, site preparation and installation.
- IQ/OQ qualification, scheduled calibration and validation support.
- Genuine spare parts, consumables and operator training in Dhaka.

Specifications, capacities and model options vary by configuration and are confirmed with each quotation. This sheet is generated from our product catalogue; the full manufacturer datasheet is available on request.
