

ENVIRONMENTAL & STABILITY SYSTEMS

Dual BOD Incubator

Two independently controlled incubation compartments in one cabinet footprint.

DESCRIPTION

Two independently controlled compartments in a single cabinet, so two incubation temperatures run side by side in the space of one unit — useful where bacterial and fungal incubation both have to happen and bench space is short.

APPLICATIONS

Parallel bacterial and fungal incubation, method comparison, small laboratories with mixed microbiological workloads.

METHOD & COMPLIANCE REFERENCE

Incubation temperatures per USP <61> and <62>.

SUPPLIED AND SUPPORTED IN BANGLADESH

- Import, customs, delivery, site preparation and installation.
- IQ/OQ qualification, scheduled calibration and validation support.
- Genuine spare parts, consumables and operator training in Dhaka.

Specifications, capacities and model options vary by configuration and are confirmed with each quotation. This sheet is generated from our product catalogue; the full manufacturer datasheet is available on request.
