

DIGITAL LABORATORY PLATFORMS

Integrated Enterprise Laboratory Platform

Principal: LabWare

One platform tying laboratory execution, quality and reporting together across sites.

DESCRIPTION

A single configured system carrying sample management, testing, quality processes and reporting across sites, so a result raised in one laboratory is visible to quality and to the batch record without being re-keyed. Consolidating removes the reconciliation work that separate systems quietly create.

APPLICATIONS

Multi-site manufacturers, contract laboratories, groups consolidating several legacy systems.

METHOD & COMPLIANCE REFERENCE

Configured and validated under GAMP 5, with record and audit trail controls per 21 CFR Part 11 and EU GMP Annex 11.

SUPPLIED AND SUPPORTED IN BANGLADESH

- Import, customs, delivery, site preparation and installation.
- IQ/OQ qualification, scheduled calibration and validation support.
- Genuine spare parts, consumables and operator training in Dhaka.

Specifications, capacities and model options vary by configuration and are confirmed with each quotation. This sheet is generated from our product catalogue; the full manufacturer datasheet is available on request.
