

ADVANCED CHEMICAL STORAGE & SAFETY CABINETS

Integrated Filter & Ventilation Systems

Filtration and ventilation built into the installation rather than bolted on.

DESCRIPTION

Filtration and ventilation designed into the storage installation — extract, filter modules, monitoring and alarms as one system rather than a cabinet with a fan added afterwards. The result is a documented air change rate that can actually be verified at qualification.

APPLICATIONS

Flammable and corrosive stores, sample preparation rooms, banks of cabinets on a shared extract.

METHOD & COMPLIANCE REFERENCE

Air change rate specified and verified at commissioning; interlocks and alarms qualified.

SUPPLIED AND SUPPORTED IN BANGLADESH

- Import, customs, delivery, site preparation and installation.
- IQ/OQ qualification, scheduled calibration and validation support.
- Genuine spare parts, consumables and operator training in Dhaka.

Specifications, capacities and model options vary by configuration and are confirmed with each quotation. This sheet is generated from our product catalogue; the full manufacturer datasheet is available on request.
