

ADVANCED SPECTROSCOPY & MATERIAL ANALYSIS

Portable Gemini Analyzer

Dual-technique handheld analyser for chemical and explosives identification.

DESCRIPTION

Pairs Raman and FTIR in one handheld unit, so materials that respond poorly to one technique are covered by the other. Searching both spectra together widens the library hit rate for genuine unknowns.

APPLICATIONS

Hazardous material response, explosives and narcotics identification, unknown substance triage.

METHOD & COMPLIANCE REFERENCE

A field screening result; confirmatory identification remains a laboratory determination.

SUPPLIED AND SUPPORTED IN BANGLADESH

- Import, customs, delivery, site preparation and installation.
- IQ/OQ qualification, scheduled calibration and validation support.
- Genuine spare parts, consumables and operator training in Dhaka.

Specifications, capacities and model options vary by configuration and are confirmed with each quotation. This sheet is generated from our product catalogue; the full manufacturer datasheet is available on request.
